

I CLAIM:

1. An eyeglass combination comprising:  
a primary frame including a first bridge and including two sides each having a stud, and

an auxiliary frame for disposing in front of said  
05 primary frame, said auxiliary frame including a second  
bridge and including two sides each having an extension  
extended rearward toward said primary frame and  
extended over said studs, said extensions each  
including a rear end having a first flange extended  
10 downward for engaging with said stud and for securing  
said auxiliary frame to said primary frame.

2. An eyeglass combination according to claim 1,  
wherein said studs of said primary frame are made of  
magnetic material, said first flanges each includes a  
magnet for engaging with said studs of magnetic  
05 material and for securing said auxiliary frame to said  
primary frame.

3. An eyeglass combination according to claim 1,  
wherein said studs of said primary frame each includes  
a first magnet, said first flanges each includes a  
second magnet for engaging with said first magnet of  
05 said stud and for securing said auxiliary frame to said  
primary frame.

4. An eyeglass combination according to claim 3,  
wherein said first and said second magnets each  
includes a first pole and a second pole disposed in

00648074 082500

Sub  
B1

04 front of said first pole.

5. An eyeglass combination according to claim 1, wherein said second bridge includes an arm extended over said first bridge of said primary frame, said arm includes a rear end having a second flange extended  
05 downward for engaging with said first bridge and for securing said auxiliary frame to said primary frame.

6. An eyeglass combination according to claim 5, wherein said first bridge of said primary frame includes a first magnet, said second flange includes a second magnet for engaging with said first magnet of  
05 said first bridge and for securing said auxiliary frame to said primary frame.

7. An eyeglass combination comprising:

a primary frame including a first bridge, said first bridge including a first magnet, and

an auxiliary frame for disposing in front of said  
05 primary frame, said auxiliary frame including a second bridge having an arm extended rearward toward said primary frame and extended over said first bridge, said arm including a rear end having a flange extended downward for engaging with said first bridge and for  
10 securing said auxiliary frame to said primary frame, said flange including a second magnet for engaging with said first magnet and for securing said auxiliary frame to said primary frame.

8. An eyeglass combination comprising:

Sub  
B2

a primary frame including a first bridge and including two sides each having a stud, and

an auxiliary frame for disposing in front of said  
05 primary frame, said auxiliary frame including a second  
bridge and including two sides each having an extension  
extended rearward toward said primary frame and  
extended over said studs, said second bridge including  
an arm extended rearward, said extensions and said arm  
10 each including a rear end having a flange extended  
downward for engaging with said stud and said first  
bridge and for securing said auxiliary frame to said  
primary frame.

9. An eyeglass combination according to claim 8,  
wherein said studs and said first bridge of said  
primary frame are made of magnetic material, said  
flanges each includes a magnet for engaging with said  
05 studs and said first bridge of magnetic material and  
for securing said auxiliary frame to said primary  
frame.
